

TIPS FOR PARENTS

Simple strategies to help my child develop early literacy skills

The first years are critical to develop the love of reading. It is never too early to start reading to your child.

- Read with your child every day in the language you know best.
- Allow your child to choose the book.
- Before reading with your child, point out the cover page, the author, and the title of the book.
- Discuss what is happening in the story. Point out things that happen on the pages, ask questions, and create a connection to your child's experiences.
- Let your child tell the story in his/her own words.

***Schedule an appointment with the Step Up AT coach to learn more strategies to help your child develop early literacy skills.**
